## Recent Work Experience

September 2019 – December 2019: Student Intern Partner for the *Mosaic Institute*

- Helped develop *18Qs*, an app that allows two users to connect with each other online and then play a questionnaire-type game with each other and then sending the results back to the Mosaic Institute for research purposes
- Worked with five other students in an organized team with weekly meetings

Summer of 2018: Summer help for *Vac Developments Aerospace Company*

- Miscellaneous jobs such as accounting, filing documents, and taking inventory using enterprise software

## Recent Side Projects

- *Notes*, an Android notes app that allows the user to create notes and insert images and voice recordings within them, demo:  
<https://www.youtube.com/watch?v=RfoJ7mikJfg&feature=youtu.be>
- *Photo Locker*, an Android app that encrypts a user's image files with a password, demo:  
[https://www.youtube.com/watch?v=UuVqQf\\_pRMg&feature=youtu.be](https://www.youtube.com/watch?v=UuVqQf_pRMg&feature=youtu.be)

## Education

- 2017 – Present: Computer Science Student at the University of Toronto (currently a third-year student)

## Skills

- Proficiency in Java, Python, JavaScript, SQL, HTML, CSS and C
- Experience working with the React framework, MongoDB, as well as OAuth and other Google APIs
